

# INTACT Symposium

## The Dynamics of Eating Disorders: Towards a better understanding of the processes of falling ill, getting well and staying well

November 12-14, 2009  
University of Minho, Braga, Portugal

### THE SYMPOSIUM

The European network INTACT ([www.intact-rtn.eu](http://www.intact-rtn.eu)) invites you to an international symposium on "The Dynamics of Eating Disorders: Towards a better understanding of the processes of falling ill, getting well and staying well".

Based on the facts that not all women at risk for the development of an eating disorder actually become ill and not all of those who develop the disorder benefit from the same type, duration, and intensity of care, the main objective of the INTACT network is the development and evaluation of individually tailored treatment and stepped care interventions. The symposium will be held in Braga (Portugal), November 12- 14, 2009.

### CALL FOR ABSTRACTS

Submissions for paper and poster presentations on the development, prevention, and treatment of eating disorders are welcome. Since INTACT represents a Research Training Network, we especially encourage young researchers (PhD students and post-doctoral fellows) to submit their work for presentation.

#### Abstract Submission:

Authors should submit abstracts online by September 15, 2009 at [www.intactsymposium.psyres.de](http://www.intactsymposium.psyres.de)

#### Local Host:

Prof. Paulo Machado  
Departamento de Psicologia  
Universidade do Minho, Braga
